Skills of Holy Quran Recitation & Tajweed ▼								
-	1	-	1	-	مهارات تلاوة القرآن الكريم وتجويده	Description: This course covers the principles of reciting the Holy Quran with proper Tajweed rules. It includes theoretical knowledge of articulation points (Makharij) and characteristics of letters (Sifaat), as well as practical application. The course emphasizes the importance of accurate recitation .in Islamic practice and its spiritual significance Outcomes: a1) Understand the rules of Tajweed and articulation points. a2) Recognize the characteristics of Arabic letters. b1) Apply Tajweed rules during recitation. c1) Demonstrate proper recitation of selected Quranic verses. d1) Develop appreciation for the spiritual and scientific aspects of .Quranic recitation	BUST01	1
Arabic Language (1) ▼								
-	2	-	-	2	اللغة العربية (1)	Description: This course provides foundational knowledge of Arabic grammar (Nahw) and morphology (Sarf). It focuses on sentence structure, nominal and verbal sentences, and basic vocabulary. The goal is to enable students to read, understand, and construct simple correct Arabic .sentences Outcomes: a1) Identify basic Arabic grammar rules. a2) Recognize different sentence structures. b1) Differentiate between nominal and verbal sentences. c1) Construct simple grammatically correct sentences. .d1) Appreciate the linguistic richness of Arabic language	BUST02	2
Arabic Language (2) ▼								
-	2	-	-	2	اللغة العربية (2)	Description: Building on Arabic Language (1), this course delves deeper into complex grammatical structures and rhetoric (Balaghah). It focuses on analyzing classical and modern Arabic texts, improving writing skills for .formal and academic purposes, and enhancing oral expression Outcomes: a1) Identify advanced Arabic grammatical structures. a2) Recognize rhetorical devices in texts. b1) Analyze classical and modern Arabic texts. c1) Write formal and academic texts in Arabic. d1) Express .ideas fluently in oral discussions	BUST03	3
English Language (1) ▼								
-	2	-	-	2	اللغة الانجليزية (1)	Description: This introductory English course focuses on developing fundamental language skills: reading, writing, listening, and speaking. It covers basic grammar, vocabulary building, and simple communication strategies. The aim is to equip students with the necessary language tools .for everyday academic and social contexts Outcomes: a1) Identify basic English grammar structures. a2) Recognize common vocabulary in academic contexts. b1) Construct simple sentences and paragraphs. c1) Communicate effectively in basic everyday situations. .d1) Utilize English language resources for self-learning	BUST04	4

Pre	CH	Clin	Pra	Lec	Arabic	Course Name	Code	#
English Language (2) ▼								
-	2	-	-	2	اللغة الانجليزية (2)	Description: A continuation of English Language (1), this course advances students’ proficiency in English. It emphasizes reading comprehension of longer texts, academic writing (paragraphs and essays), listening to lectures, and oral presentations. It prepares students for technical and medical English courses Outcomes: a1) Identify advanced grammatical structures. a2) Recognize academic writing conventions. b1) Analyze complex texts for main ideas and details. c1) Write coherent paragraphs and short essays. d1) Deliver effective oral presentations on academic topics	BUST05	5
National Culture (1) ▼								
-	2	-	-	2	الثقافة الوطنية (1)	Description: This course explores the history, geography, and cultural heritage of the nation. It covers key historical events, societal values, national identity, and the country’s political and economic development. The aim is to foster a sense of belonging and national pride Outcomes: a1) Identify major historical events and figures. a2) Recognize the geographical features of the nation. b1) Analyze the development of national identity. c1) Connect historical events to contemporary society. d1) Demonstrate pride in national heritage and culture	BUST06	6
National Culture (2) ▼								
-	2	-	-	2	الثقافة الوطنية (2)	Description: An advanced course on national culture, focusing on contemporary issues, national发展战略, and the country’s role in the regional and global context. It encourages critical analysis of social changes and promotes active citizenship and contribution to national development Outcomes: a1) Identify contemporary national issues. a2) Recognize the country’s role in regional and global affairs. b1) Analyze social changes and their impact. c1) Propose solutions for national challenges. d1) Demonstrate active citizenship and commitment to national development	BUST07	7
-	2	-	-	2	الثقافة الوطنية (3)	Description: This course provides practical training in essential computer applications. Topics include operating systems, word processing (MS Word), spreadsheets (MS Excel), presentations (MS PowerPoint), and internet fundamentals. Emphasis is on skills required for academic work and dental practice management Outcomes: a1) Identify basic computer hardware and software components. a2) Recognize the functions of operating systems. b1) Differentiate between various software applications. c1) Create documents, spreadsheets, and presentations. d1) Utilize internet resources effectively and safely	BUST08	8

Pre	CH	Clin	Pra	Lec	Arabic	Course Name	Code	#
-	2	-	-	2	الثقافة الوطنية (1)	National Culture (1) ▼	BUST06	1
						Description: This course explores the history, geography, and cultural heritage of the nation. It covers key historical events, societal values, national identity, and the country’s political and economic development.		
						Outcomes: a1) Identify major historical events and figures. a2) Recognize the geographical features of the nation. b1) Analyze the development of national identity. c1) Connect historical events to contemporary society.		
-	2	-	-	2	اللغة العربية (1)	Arabic Language (1) ▼	BUST02	2
						Description: This course provides foundational knowledge of Arabic grammar (Nahw) and morphology (Sarf). It focuses on sentence structure, nominal and verbal sentences, and basic vocabulary.		
						Outcomes: a1) Identify basic Arabic grammar rules. a2) Recognize different sentence structures. b1) Differentiate between nominal and verbal sentences. c1) Construct simple grammatically correct sentences.		

Pre	CH	Clin	Pra	Lec	Arabic	Course Name	Code	#
English Language (1) ▼								
-	2	-	-	2	اللغة الانجليزية (1)	Description: This introductory English course focuses on developing fundamental language skills: reading, writing, listening, and speaking. It covers basic grammar, vocabulary building, and simple communication strategies. The aim is to equip students with the necessary language tools for everyday academic and social contexts. Outcomes: a1) Identify basic English grammar structures. a2) Recognize common vocabulary in academic contexts. b1) Construct simple sentences and paragraphs. c1) Communicate effectively in basic everyday situations. d1) Utilize English language resources for self-learning.	BUST04	3
Biochemistry ▼								
BDNT03	3	-	2	2	الكيمياء الحيوية	Description: This course covers the structure and function of biomolecules (proteins, carbohydrates, lipids, nucleic acids), enzyme kinetics, major metabolic pathways, and their regulation. It integrates biochemical principles with oral health, nutrition, and dental pathologies. Outcomes: a1) Define the science of anatomy and terminology. a2) Name and describe skeleton parts and body systems. b1) Distinguish between types of joints, fascia and muscles. b2) Name and describe structure of body systems. c1) Name and describe muscles of face and oral cavity. c2) Identify bones and muscles of head and neck. d1) Present scientific topics effectively	BDS717	4
Biophysics ▼								
-	3	-	2	2	الفيزياء الحيوية	Description: This course provides an introduction to medical physics, covering key physical principles as applied to medical imaging and radiation therapy. Topics include radiation properties, imaging metrics, ionizing radiation safety, radioactivity, ultrasound, and magnetic resonance imaging. Outcomes: a1) Define principles of physics related to biomedical applications. a2) Describe imaging systems and physical principles. b1) Describe basic principles in radiation therapy. b2) Develop understanding of biotechnology related to teeth treatment. c1) Employ knowledge to solve problems in radiation safety	BDS718	5

Pre	CH	Clin	Pra	Lec	Arabic	Course Name	Code	#
Psychology in Dentistry ▼								
-	2	-	-	2	علم النفس في طب الأسنان	Description: This course gives a general overview of prominent topics in psychology, including its definition, fields, schools, and goals. It focuses on human personality and the biological and environmental determinants of human behavior, with emphasis on .managing patient anxiety and communication in dental settings Outcomes: a1) Describe concepts, goals and schools of psychology. a2) Explain human personality patterns. b1) Compare biological and environmental determinants of behavior. b2) Analyze motives and emotions. c1) Apply psychological skills in dealing with different personality patterns. c2) Apply ethical standards in diagnosis and treatment. d1) Develop self-learning abilities using various sources. d2) Communicate ideas clearly in writing and orally	BDS719	6
-	1	-	-	1	مقدمة في طب الأسنان		BDS719	7
Dental Anatomy (1) ▼								
-	2	-	2	1	تشريح الأسنان (1)	Description: Dental anatomy and morphology (1) course comprises instructions in the principle of dental anatomy nomenclature and morphology of teeth. Students gain basic knowledge of scientific basis of dental anatomy and tooth morphology, recognize structure and function of human dentition in health and disease, and engage in self-learning of teeth drawing .and carving Outcomes: a1) Show basic knowledge of scientific basis of dental anatomy and tooth morphology. a2) Recognize the structure and function of human dentition in health and disease. b1) Recognize the different clinical conditions of human teeth. c1) Apply preventive measures for different age groups. d1) Engage in self-learning of .teeth drawing and carving using updated methods	BDS501	8
